DONJOY®

DonJoy ActyLight®

Fit-and-forget ankle support

The convenience and comfort of the DonJoy ActyLight® ankle support means patients will forget they're even wearing it. Its step-in design and lockable lace system provide a fast, secure fit that's complemented by a pair of removable anatomical stays. Their simple adaptability enables both acute and chronic use, so ActyLight can support patients throughout their treatment.

Intended use/Indications

DonJoy ActyLight is designed to provide support and stabilization to the ankle.

- Initial management of chronic ankle instabilities
- Mild to moderate sprains of the lateral ligament
- Isolated syndesmotic injuries (Grade 1)
- Return to sports, prevention of re-injury
- Ligament instability
- Supination prevention

Features and benefits

Step-in design makes donning and doffing quick and easy

Secure lace-locking mechanism enables precise tightening, helps maintain a consistent fit, and allows quick release

Lightweight, breathable fabrics help the foot stay cool and dry to aid compliance

Figure-8 straps provide inversion/eversion control

Anatomically contoured bilateral stays provide additional stability and protection and can be repositioned to accommodate the malleoli

Fits inside a trainer comfortably allowing patients to stay active

Modular design means the support can be adapted easily for acute or chronic use by removing the stays

How it Works

ActyLight's step-in-sleeve design provides proprioceptive feedback and works with supportive elements to stabilize the ankle and restrict excessive range of movement.

- **Bilateral semi-rigid supports** provide mechanical stability to prevent ankle inversion/eversion
- **Figure-8 straps** provide further ankle inversion/eversion control
- **Forefoot mesh** made from breathable material to provide proprioceptive and compressive support for the foot
